

Every year, around the world  
we create more than  
**300 million tonnes**  
of plastic - half of which  
is single-use.

**A million**  
plastic bottles  
are sold every  
minute around  
the world  
& more than  
**half a trillion**  
will be sold  
annually by  
the end of the  
decade.

A 1 litre single-  
use plastic water  
bottle takes over  
**8 litres** of water  
to produce.

Single-use  
plastic bottles  
are consistently  
in the **top 10**  
most polluting  
items in our  
rivers and  
oceans.

**But there is another way...**

Download the free Refill app to  
find free drinking water on the go.

Save money, stay hydrated  
& prevent plastic pollution.
